

PART 4

VEHICLES

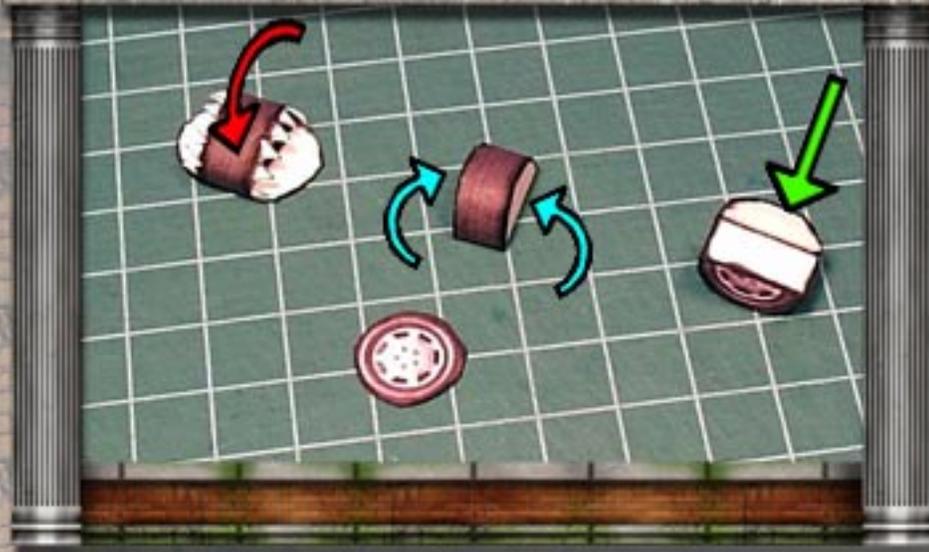

A variety of vehicles are included in this set to add flavour and round out it's contents.

In addition to an armoured van and modern cars, three classic cars are also included for players with a historical bent.

MAYHEM CENTRAL CITY BANK

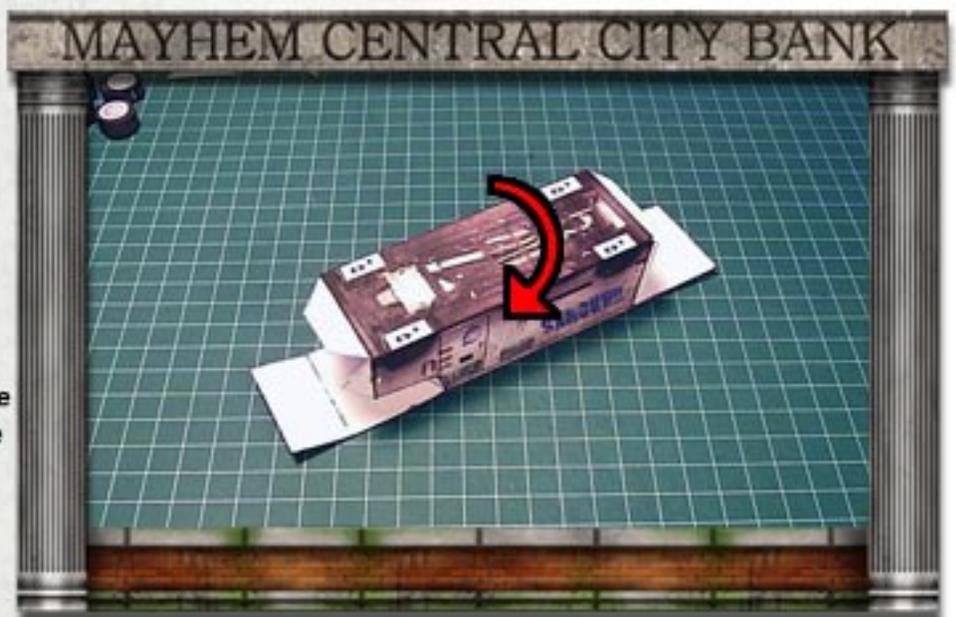

Begin by scoring, cutting out, folding and edging each vehicle component.

All the tires are made the same. First, glue the tab at the end of the tire tread to the other side, making an arc. Next, glue the sides of the tire into place. Finally, glue the flat tire facing to the blank side of the tire as shown.

Learn all about edging and other top tips in the tutorials section at www.worldworksgames.com

The armoured van is the simplest vehicle. Begin by running a bead of glue along the tab running down the side of the van and match this up to the other side.

NOTE: With all the vehicles, make sure you allow each step to dry fully before moving onto the next step.

MAYHEM CENTRAL CITY BANK

MAYHEM CENTRAL CITY BANK

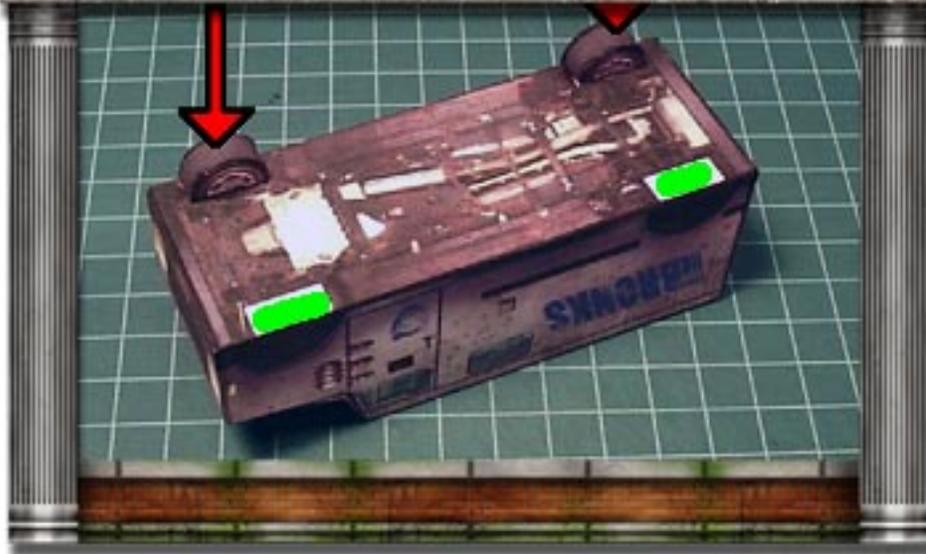

Apply glue to the front tabs of the van and glue the windshield into place.

Next glue the hood and grill into place.

Finally glue the back of the van into place.

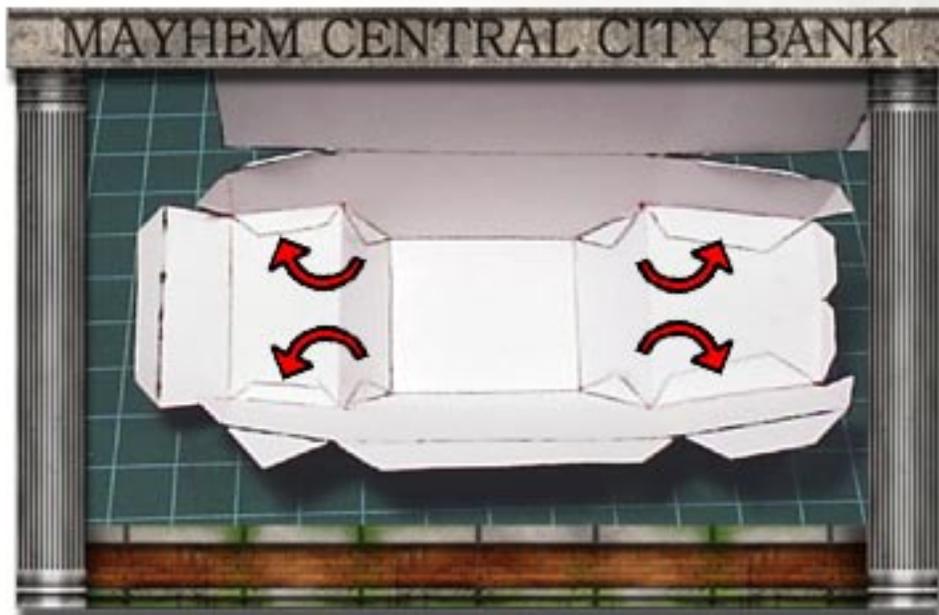

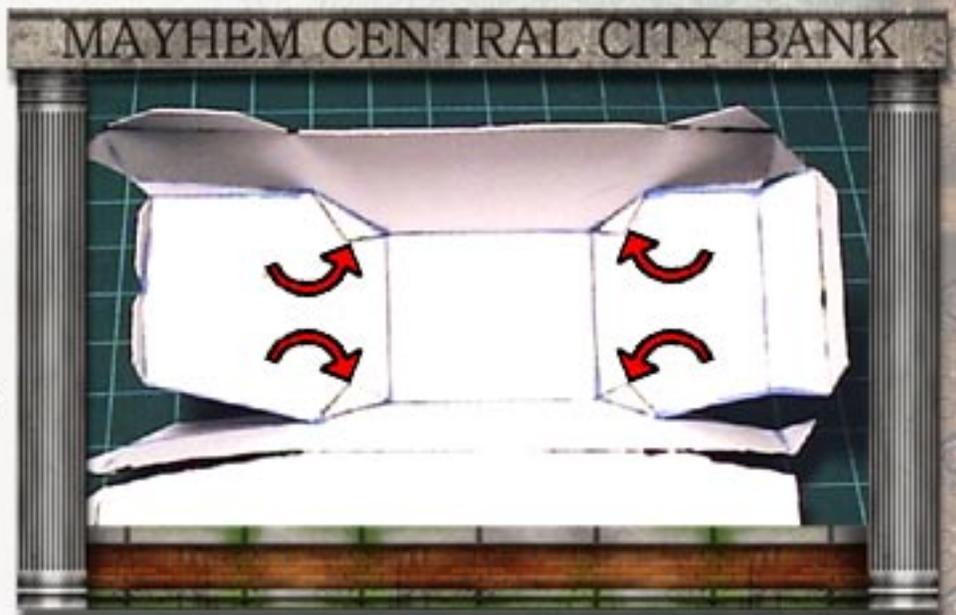

MAYHEM CENTRAL CITY BANK

Glue the completed wheels to the underside of the armored van by attaching them to the designated glue areas as shown and to the sides of the van.

Next we'll move on to the modern cars.

Begin by applying glue to the small triangular tabs on the insides of the front and rear windshields and attach them as shown.

Next, apply glue to the tabs running along the insides of the trunk and hood and attach them.

MAYHEM CENTRAL CITY BANK

Glue and fold up the tailgate.

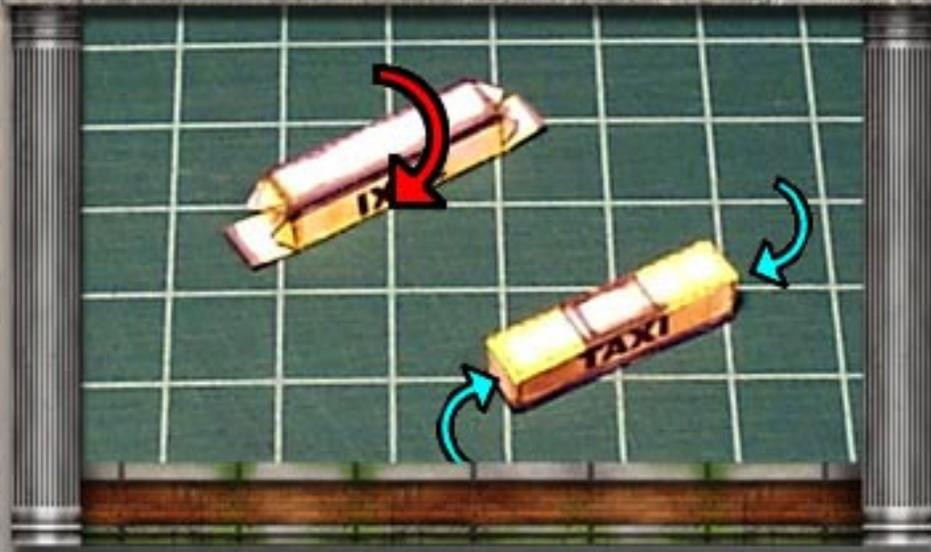

When that's dry, apply glue to the perimeter tabs and fold down the undercarriage as shown.

This will require a little bit of working over and tweezers can be tremendously helpful here.

Finish the modern cars by attaching the front grill and adding the wheels as shown.

MAYHEM CENTRAL CITY BANK

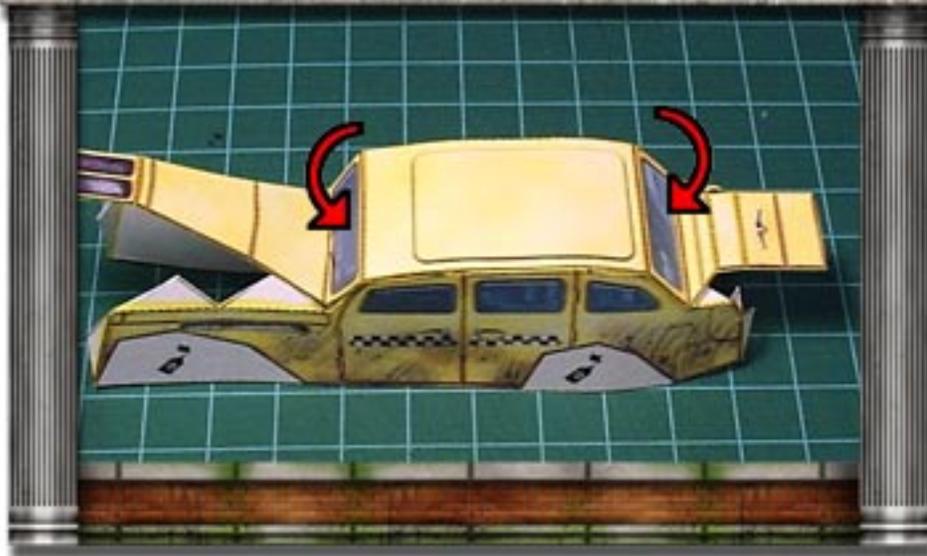

For the taxis signs apply a bead of glue to the long tab on the side of the box and fold it over to meet the other side.

When this is dry, apply glue to the remaining tabs and fold the ends into place.

Glue the finished sign to the roof of your taxi.

MAYHEM CENTRAL CITY BANK

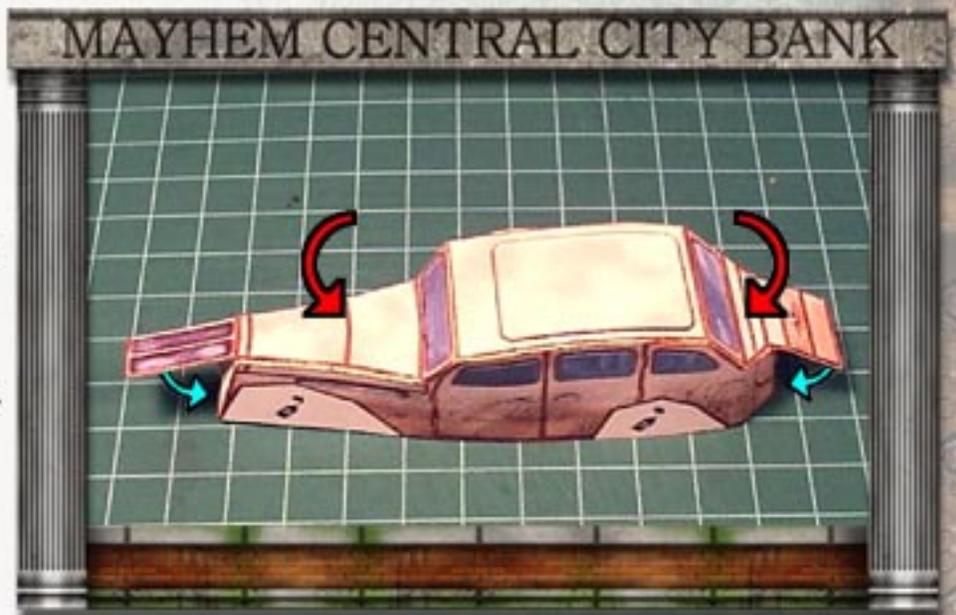

The classic cars are similar to the modern ones but slightly more complex.

Begin as before by attaching the front and rear windshields.

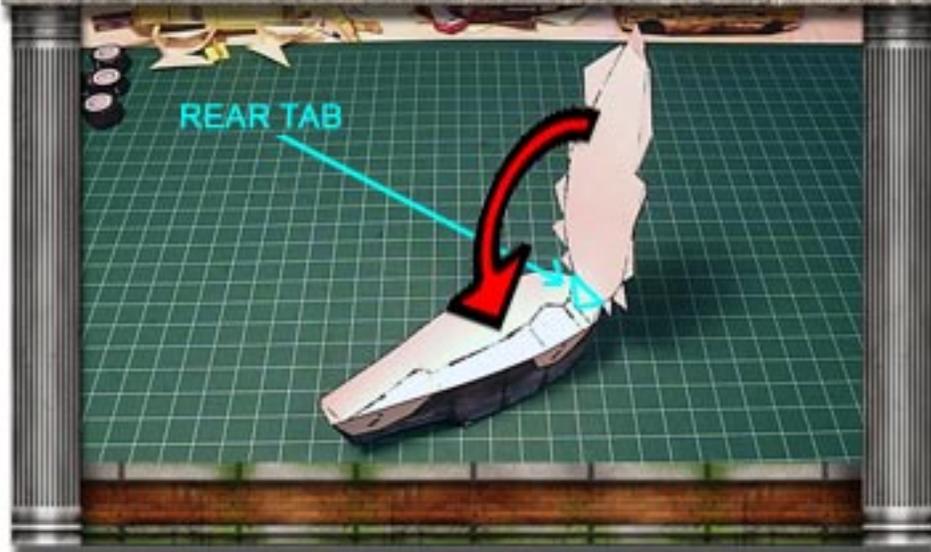

Next glue the hood and the top of the trunk into place.

Finish by gluing the front grill and back of the trunk into place as shown.

MAYHEM CENTRAL CITY BANK

MAYHEM CENTRAL CITY BANK

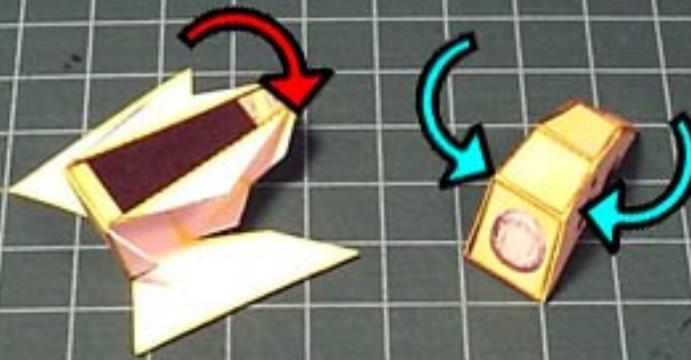

Attach the undercarriage to the chassis at the rear tab **FIRST** and allow this to dry.

Fold down and work the undercarriage into place to complete the main chassis.

MAYHEM CENTRAL CITY BANK

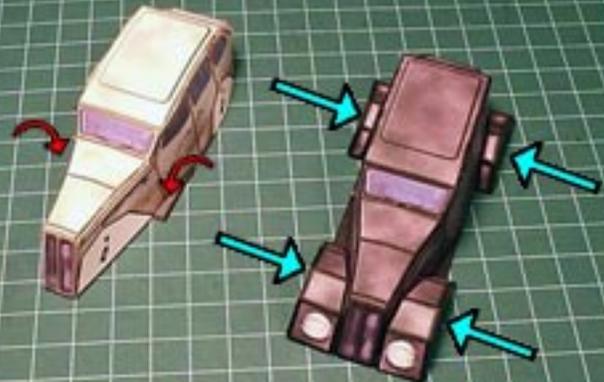

The fenders are like boxes but with odd shapes. Apply a drop of glue to the end tab of the fender and fold it over to meet the other side.

When dry, fold up the sides to close the shape.

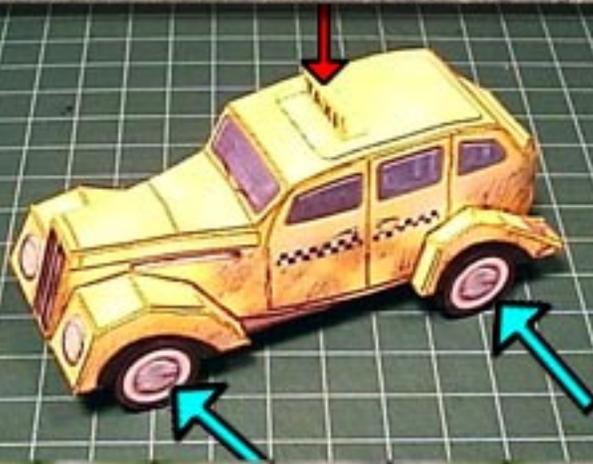

Finish the chassis by applying glue to the running boards and folding them over onto themselves.

Glue the finished fenders to the chassis (big ones up front, small ones in back).

MAYHEM CENTRAL CITY BANK

MAYHEM CENTRAL CITY BANK

Finish the car by adding the tires.

For the taxi, a simple fold-over sign is provided to add the finishing touch.
